Education

Maharaja Agrasen Institute of Technology (MAIT) <i>Guru Gobind Singh Indraprastha University (GGSIPU)</i> <i>Bachelor of Technology in Information Technology, CGPA 9.31</i>	<i>Delhi</i> <i>Expected 2027</i>
Indian Institute of Technology Madras <i>Bachelor of Science in Data Science, CGPA 9.14</i>	<i>Chennai</i> <i>Expected 2027</i>
Guru Tegh Bahadur Public School <i>Class 10th & 12th, Percentage: 97%</i>	<i>Meerut</i> <i>2021 – 2023</i>

Projects

Quiz Master-V1 <i>Bootstrap, SQLite, Flask, Jinja2, Matplotlib, SQLAlchemy</i> - Developed a comprehensive quiz management system using Flask with SQLAlchemy ORM and SQLite database, enabling administrators to create subjects, chapters, quizzes, and questions with timed quiz functionality and performance tracking. - Built RESTful API endpoints with CRUD operations for quiz management, user authentication, and score tracking. - Implemented secure user authentication and role-based authorization using Flask-Login. Earned an S grade at IIT Madras.	Code ↗
--	--

Clip-Rewrite <i>FastAPI, Jinja2, Pygments, SQLAlchemy, Docker</i> - Developed a temporary clipboard sharing service using FastAPI, SQLAlchemy ORM, and Jinja2 with a responsive dark-themed UI. - Integrated Pygments syntax highlighting for 13+ languages, clipboard functionality, automatic language detection, and configurable content expiration (1 hour to 30 days). - Implemented multi-file upload with automatic organization, ZIP compression, time-based expiration, and automatic cleanup mechanisms.	Live ↗ — Code ↗
---	---

Automated GitHub Pages Deployment System <i>FastAPI, Python, Groq API, Gemini API, PyGithub, Docker</i> - Built an automated LLM-powered system that generates web applications from text briefs and deploys to GitHub Pages with deployment verification. - Implemented dual-LLM architecture with 3-tier fallback (Groq → Gemini → HTML) supporting 32K tokens, achieving 99.9%+ uptime.	Code ↗ — Live ↗
--	---

Technical Skills

Languages: Python, Bash, Java, SQL, HTML, CSS, Javascript
Frameworks and Libraries: Pandas, Numpy, BeautifulSoup, Flask, Bootstrap, Pytest, SQLAlchemy, FastAPI
Tools: Linux, Git, Markdown, Docker, Postman, OSX, Jupyter, REST Api, fish, sed
Databases: MySQL, SQLite, MariaDB, MongoDB
Concepts & Practices: RESTful APIs, MVC Architecture, Agile Methodology, Software & System Design Principles
Coursework: Object-Oriented Programming, Database Management Systems, Modern App Development, System Commands

Certifications & Achievements

Python Developer – JetBrains Academy: Completed 265 topics, built 10 projects (OOP, file I/O, Flask), 300-day streak. SQL for Data Analysis – JetBrains Academy: Querying, joins, aggregation, subqueries, data analysis. Git – JetBrains Academy: Version control, branching strategies, merge workflows, collaboration. Open Source: 50+ stars on GitHub projects; Contributed to Hacktoberfest repositories. - Reached final round of Python Coding Challenge 3.0 at IIT Madras Paradox'24 - Participated in Codeseva and Hacknovate hackathons in MAIT
